

EZDraw 200

Wire Drawing Lubricant

Description

EZDraw 200 is a medium titer, high fat content, soluble soap. It is manufactured under controlled conditions that ensure product uniformity and low moisture.

Applications

EZDraw 200 is used when a clean bright finish is needed on the wire

- Low carbon and medium carbon steel
- Mechanically descaled or acid cleaned and coated rod
- Borax, Lime, Phosphate or Formulated precoats.

Operating Parameters

- Last hole of a multi hole application to help clean up the surface
- 1-3 hole drawing
- Liquid soap bath for borax and phosphate coatings prior to drawing
